Why Do We Have Toes?

- Assist humans while walking
- Provide balance and posture
- Assist in weight bearing
- Provide thrust during gait
- Increase length of stride for increased speed

- His body was gunned down
- But he died without a frown
- For his death was quite acute
- And only secondarily from the dispute
- Six bullets tore through his skin
- But none through his chin
- The problem arose through his left renal hose
- But I usually travel through the nose
- His belly was jelly
- But his thorax was clean for I traveled a great distance
- Without being seen before I stopped his heart in this
- Particular instance
- What am I?
